

Busari Roqeeb

Backend Developer

Lagos, Nigeria | <https://github.com/Callerstudios> | +234-807-050-5661 | busariroqeeb16@gmail.com

SUMMARY

Backend Developer experienced in building RESTful APIs using Node.js, TypeScript, and MySQL. Skilled in designing backend systems with a focus on data integrity, transaction safety, and clean service architecture. Built production-style APIs including a restaurant ordering system and a URL shortening service with analytics.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Backend: Node.js, Express.js

Databases: MySQL

Tools: Git, Swagger/OpenAPI

Concepts: REST APIs, SQL Transactions, Relational Database Design, Authentication and Authorization, Error Handling

PROJECTS

Restaurant Ordering API

GitHub: [Restaurant API](#)

Docs: [Restaurant Docs](#)

Tech: Node.js, Express.js, TypeScript, MySQL

Developed a production-style REST API for restaurant ordering with role-based authentication, transaction-safe order processing, and lifecycle management.

- Designed a normalized relational database schema for restaurants, menus, orders, and users.
- Implemented JWT-based authentication and role-based authorization using a service–repository architecture.
- Designed a transaction-safe order processing system using MySQL transactions to ensure data consistency during concurrent operations.
- Prevented invalid order state transitions through concurrency-safe business logic.
- Implemented server-side pagination and filtering to efficiently handle large datasets and reduce query response times.
- Deployed the API on Render with a managed MySQL database.

URL Shortener Service

GitHub: [URL Shortener API](#)

View URL: [URL Shortener View URL](#)

Tech: Node.js, Express.js, TypeScript, MySQL

Built a URL shortening service with analytics tracking for link usage and click monitoring.

- Implemented RESTful endpoints for URL creation, retrieval, and redirection.
- Implemented unique short-code generation.
- Added click analytics to track link usage.
- Designed the relational database schema for URLs and analytics records.
- Deployed the service on Render for public access and testing.

EDUCATION

Ladoke Akintola University of Technology

B.Tech. in Computer Engineering

Ogbomosho, Oyo State

Graduated: October 2025
